Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3634

1. Claims 2-5,10-13,18,19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims recite "a clocking feature" which is an indefinite recitation for it does not set forth a structural limitation nor convey a functional statement.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6,9-14,17-20 are rejected under 35 U.S.C. 102 (b) as being unpatentable over Curtis. Curtis discloses the claimed spring tensioning mechanism including a support bracket 20, inboard and outboard plates 22,26, a spring 16, an axle 12, and a drum 14.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7,8,15,16 are rejected as being unpatentable over Curtis in view of Eichenberger. While Curtis does not disclose the use of receivers, Eichenberger discloses a spring tensioning mechanism comprising receivers 62, wherein, to

incorporate this teaching into the spring tensioning mechanism of Curtis for the purpose of facilitating the adjustment of the spring would have been obvious to one of ordinary skill in the art. As to the receiver as being squared shape, inasmuch as there is nothing to indicate that the particular shape of the receiver is significant or is more than anyone of numerous shapes one having ordinary skill in the art would have recognized for the purpose of accommodating various shaped tools, no patentable weight has been attributed thereto.

4. Attention is directed to the following references which are considered pertinent to the applicant's claimed device: Krupke et al '235 and '835, Wells, et al, Miller et al, Scates, Finch et al, Daus et al, Mitchell.
